**Subject:** Public Comment on FR DOCKET NUMBER 04-7984, Mandatory Guidelines

Please make changes to the proposed drug testing guidelines so that they do not discriminate against those of us who suffer from paruresis. A person with paruresis is **MEDICALLY UNABLE** to produce a urine specimen on demand, regardless of urgency. Requiring that such a person drink 40 ounces of liquid in three hours is an unbelievably cruel thing to do to people like me. SAMHSA should be mandating the use of saliva, hair, sweat or blood for people who cannot provide urine specimens. This is an important issue, the current testing discriminates against paruretics and severely limits their employment options!
